

LLAMAWERX

OPENAT SOLUTIONS

Design, Development & Integration for Wavecom Wireless Modules

THE STANDISH GROUP REPORTS...

- » 18% of software development projects **failed**
- » 53% were **challenged**
- » Average cost of project **overrun** was 56%

ABI RESEARCH PREDICTS...

- » 31% **Growth Rate** for M2M Module Markets thru 2012

Software is challenging, costs are rising, complexity is increasing

Experience is critical to success!

WHY LLAMAWERX?

- ✓ 30+ years experience
 - embedded
 - wireless
 - networking
- ✓ OpenAT Certified Professional Developer
- ✓ Real-world OpenAT experience
- ✓ GSM/GPRS
- ✓ GPS/GIS

EXPERIENCE: OPENAT

Wavecom's OpenAT architecture lowers product cost, reduces software risk and shrinks your time-to-market. Llamawerx engineers understand the software and hardware capabilities Wavecom offers and effectively map them into your product.

In addition to trained OpenAT professionals, our firm has real-world OpenAT experience delivering complex applications using Wavecom's Q24 series wireless processors, GPS, SMS, GPRS and WIPLib.

FOCUS: SOLUTIONS!

Llamawerx excels at building products where collaboration and innovation are critical. By partnering with our clients we come to understand their challenges – technical and business – enabling us to offer cost-effective solutions.

- » In-vehicle telemetry
- » Remote sensors
- » GPS/GIS integration
- » Smart devices

ENGINEERING: FLEXIBILITY

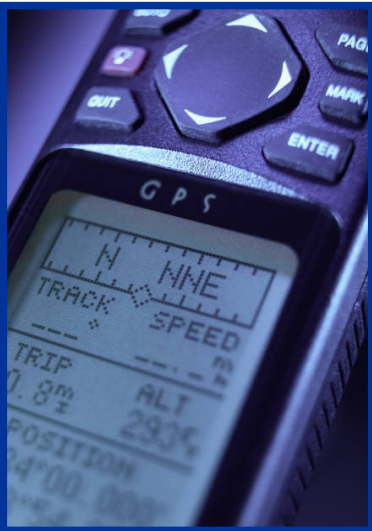

Six month planning cycles, one year of development, three months of testing – timelines like these don't allow your business the flexibility to excel in today's competitive market. Close collaboration and communication ensures business needs are met when the project is complete.

- » Communication
- » Flexibility
- » Continuous delivery
- » On-demand

We needed some OpenAT development done quickly and Llamawerx delivered!

GPS Technology Solutions

LLAMAWERX OPENAT SOLUTIONS

CONSULTING: AN ART & SCIENCE

It's about being an **expert**. It's about being **objective**. And it's about **challenging** the client's **thinking**. But most of all it's about **listening**.

At Llamawerx, we put our knowledge to work for you; from product planning and definition, through design, development, and deployment we tailor a solution for **your** needs.

SERVICE: FULL-LIFECYCLE

On projects we've assumed many different responsibilities – project management, system & software architecture, programming, technical and line management – successfully delivering large projects on schedule.

- » Concept & Definition
- » Project Management
- » System Engineering
- » Architecture & Design
- » Iterative Development
- » Integration, Testing & Service

We can assist you a little or a lot – or help you determine what needs to be done and when.

QUALITY: BUILT-IN

"Quality is never an accident" – William A. Foster

Quality is the little things that add up to a truly great product. Our software developers adhere to guidelines – configuration management, modular design, coding and programming language standards – developed to ensure quality results.
